

# NSI CONCRETE ADDITIVE CALCIUM CHLORIDE

**Northern Salt**  
INCORPORATED

## CONCRETE

Northern Salt's premium calcium chloride concrete additive is a top choice for suppliers, manufacturers, & contractors. Take the worry out of cold weather pouring with the addition of calcium chloride to kick start set time, improve concrete durability, and extend lifespan. Save time and money using calcium chloride to produce better concrete results, faster.

- Accelerates concrete hydration to reduce set time & bleeding
- Prevents freeze & thaw damage
- Improved workability
- Increased strength
- High efficiency & low cost
- Aids corrosion protection
